

vtiger Quick Edit version 1.0

Quick Edit lets you change several records field value at once.

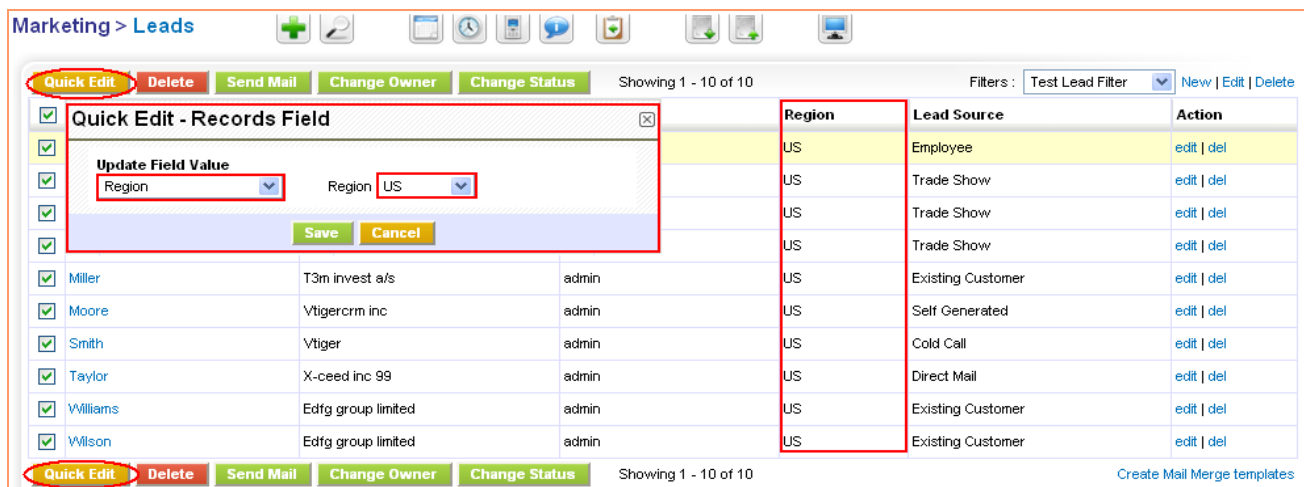

In the current release, the quick edit feature is available only for leads module.

After applying the patch (codebase 5.0.4) you will see Quick Edit button in the Leads ListView.

Select list of records and press Quick Edit button.

Now select the field you like to update and enter the value. Press Save

You will see the result of the update on success.

NOTE

- This version adds support only for Leads Module.
